

## Contouring Comfort Strap Backs

The Healthwares Contouring Comfort Strap Back is a flexible contour backrest for wheelchairs incorporating a series of adjustable straps with a zippered padded cover. The adjustable back straps allow contouring for accommodation of fixed or flexible spines/backs, greater trunk stability, active extension of the lumbar, improved head control by stacking the spine in an anatomically correct position, and more room for end users with redundant tissue. Customize the cover padding with thicker foam, gel packs, or air cells.

The Strap Back is lightweight and foldable—similar to conventional sling backrests—while offering the advantages of positioning adjustability, uniform pressure distribution, and improved user comfort. Made of high quality fabrics for wear resistance and long life.

Part No.	Description	Sugg. Retail
60-AB-530	16" Strap Back	\$287.50

## E-Z SEATING STUMP SUPPORT

Right or left contoured extension provides proper support and position for below knee amputees. The extension automatically locks when raised to the fully extended position. If full extension is not desired, a second adjustable angle may be set to meet individual user needs. Release mechanism allows user to lower pad extension with ease and safety. Extension pad comes standard at 6" wide by 11" and can be adjusted to match cushion
